Statistics

The George R. Brown School of Engineering

Chair
Katherine B. Ensor

Professors
Bryan W. Brown
Dennis Cox
Mahmoud El-Gamal
Don H. Johnson
Marek Kimmel
Javier Rojo
David W. Scott
Robin Sickle
James R. Thompson
Edward E. Williams
Rick K. Wilson

Professors Emeriti
John W. Brelsford
Paul Pfeiffer

Associate Professors
Rudy Guerra
David M. Lane

Assistant Professor
Quintus Jett

Adjunct Professors
E. Neely Atkinson
Donald A. Berry
Barry W. Brown
Ranajit Chakraborty
Thomas D. Downs
Ralph F. Frankowski
Richard Heydorn
Dennis A. Johnston
Gary Rosner
Howard D. Thames, Jr.
Robert A. White
Stuart Zimmerman

Adjunct Associate Professors
Joaquin Diaz-Saiz
Kim-Anh Do
Carl S. Hacker
Kenneth Hess

Lecturers
L. Scott Baggett
Peter Olofsson
Michael Pearlman

Degrees Offered: B.A., M.Stat., M.A., Ph.D.

Course work in statistics acquaints students with the role played in the modern world by probabilistic and statistical ideas and methods. Students grow familiar with both the theory and the applications of techniques in common use as they are trained in statistical research. The flexibility of the undergraduate program allows students to concentrate on theoretical or applied training, or they may link their studies in statistics to work in other related departments (see majors in economics, education, electrical and computer engineering, computational and applied mathematics, managerial studies, political science, and psychology). Graduate study has concentrations in applied probability, bioinformatics, biomathematics, biostatistics, computational finance, data analysis, density estimation, epidemiology, image processing, model building, quality control, statistical computing, spatial processes, stochastic processes, and time series analysis. A joint M.B.A./master of engineering degree is also available in conjunction with the Jesse H. Jones Graduate School of Management.
Degree Requirements for B.A. in Statistics

For general university requirements, see Graduation Requirements (pages 16–18). Students majoring in statistics normally complete the following:

- MATH 101/102 Single Variable Calculus I and II
- MATH 211 Ordinary Differential Equations and Linear Algebra
- CAAM 210 or 211 Introduction to Engineering Computation
- STAT 300 Model Building
- STAT 310 Probability and Statistics
- STAT 410 Introduction to Statistical Computing and Regression
- 5 elective courses from the statistics department (or other departments with approval from their adviser) at the 300 level or higher

Mathematically oriented students should also take MATH 212 Multivariable Calculus and MATH 355 Linear Algebra (or CAAM 335 Matrix Analysis).

Degree Requirements for M.Stat., M.A., and Ph.D. in Statistics

For general university requirements, see Graduate Degrees (pages 60–65). Admissions applications should include scores on the Graduate Record Examination (GRE) in the quantitative, verbal, and analytical tests. Financial support is available for well-qualified doctoral students. Course work for all degree programs should be at the 400 level or above, although 2 approved 300-level courses may be accepted.

Master’s Programs. Candidates for the nonthesis M.Stat. degree must complete 30 semester hours of approved course work. Candidates for the M.A. degree in statistics must complete 30 semester hours of approved course work as well as one of the following: (1) complete an original thesis and defend it in a public oral examination; or (2) perform satisfactorily on the second-year Ph.D. comprehensive examinations.

Ph.D. Program. Candidates for the Ph.D. degree in statistics must:

- Complete at least 90 semester hours of approved course work beyond the bachelor’s degree and a minimum of 60 hours beyond a master’s degree
- Perform satisfactorily on preliminary and qualifying examinations
- Complete an original thesis with a public oral defense

See STAT (pages 537–541) in the Courses of Instruction section.
