Degrees Offered: BA, BSChE, MChE, MS, PhD

This major gives undergraduates a sound scientific and technical grounding for further development in a variety of professional environments. Courses in mathematics, chemistry, physics, and computational engineering provide the background for the chemical engineering core, which introduces students to chemical process fundamentals, fluid mechanics, heat and mass transfer, thermodynamics, kinetics, reactor design, process control, and process design. Course electives may be used to create a focus area in one of the following four disciplines: bioengineering, environmental engineering, materials science/engineering, and computational engineering. Upon completing either the flexible BA requirements or the more scientific and professional BSChE requirements, students may apply for a fifth year of study leading to the nonthesis Master of Chemical Engineering (MChE) degree. A joint MBA/MChE degree is also available in conjunction with the Jesse H. Jones Graduate School of Management.

Students admitted for graduate studies leading to the MS or PhD degrees must complete a rigorous program combining advanced course work and original research that must be formalized in an approved thesis. Graduate research is possible in a number of areas, including thermodynamics, interfacial phenomena, complex fluids, polymer science and rheology, process control and optimization, reaction engineering and catalysis, reservoir engineering, biotechnology, and biomedical engineering.

Degree Requirements for BS in Chemical Engineering

For general university requirements, see Graduation Requirements (pages 14–15). The BS degree is accredited by the Accreditation Board for Engineering and
Technology (ABET). Through careful selection of other engineering and science courses, a student can develop a focus (or concentration) area in any of the following 4 engineering disciplines: environmental science/engineering, bioengineering, materials science/engineering, and computational engineering. These elective programs can be completed within the framework of a BS in chemical engineering. Students majoring in chemical engineering must complete 96 hours in the courses specified below for a minimum of 132 hours at graduation.

The undergraduate curriculum is designed so that outstanding students interested in careers in research and teaching may enter graduate school after earning either bachelor's degree.

**Degree Requirements for BA in Chemical Engineering**

**Chemistry**
- CHEM 121/122 Introduction to General Chemistry with Laboratory
- CHEM 151/152 Honors Chemistry with Laboratory
- CHEM 211/212 Organic Chemistry
- CHEM 311/312 Physical Chemistry
- CHEM 217 Organic Chemistry Lab

**Chemical Engineering**
- CENG 301 Chemical Engineering Fundamentals
- CENG 303 Computer Programming in Chemical Engineering
- CENG 305 Computational Methods for Chemical Engineers
- CENG 343 Chemical Engineering Lab I
- CENG 390 Kinetics and Reactor Design
- CENG 401/402 Transport Phenomena I and II
- CENG 403 Design Fundamentals
- CENG 404 Product and Process Design
- CENG 411/412 Thermodynamics I and II
- CENG 443 Chemical Engineering Lab II
- CENG 470 Process Dynamics and Control

**Mathematics**
- MATH 101/102 Single Variable Calculus I and II
- MATH 211 Ordinary Differential Equations and Linear Algebra
- MATH 212 Multivariable Calculus or equivalent honors courses

**Physics**
- PHYS 101 or 111 Mechanics
- PHYS 102 or 112 Electricity and Magnetism

**Mechanical Engineering**
- MECH 211 Engineering Mechanics

**Engineering Breadth**
- 1 approved basic science course
- 3 courses from the following:
  - ELEC 243 Electrical Circuits
  - MSCI 301 Materials Science
  - CEVE 300 Mechanics of Solids
  - CEVE 434 Chemical Transport and Fate in the Environment
  - BIOE 420 Biosystems Transport and Reaction Processes
  - BIOE 460 Biochemical Engineering
  - CEVE 411 Air Resource Management or see requirements for focus areas in environmental science/engineering, bioengineering, materials science/engineering, and computational engineering

With the approval of the departmental undergraduate studies committee, students can also develop a focus (or concentration) area by substituting other engineering or science courses for those listed under Engineering Breadth.

Students pursuing the BA degree in chemical engineering must meet all of the requirements for the BScChE. degree except for the following courses: CENG 404 and CENG 470, the additional “basic science” course, and the 3 “other engineering” courses. Free electives may be substituted for these 6 courses to reach at least 132 semester hours for graduation.
Prerequisites for Chemical Engineering Courses—Before undergraduates may register for courses in chemical engineering at the 300 level and above, they must satisfy the following prerequisites.

For CENG 301
Math 101/102
CHEM 121/122 or CHEM 151/152
Corequisite: CENG 303

For CENG 390
CENG 301, 303, and 305
MATH 211/212

For CENG 401
CENG 411
MATH 211/212
PHYS 101/102
Co/Prerequisite: CENG 305

For CENG 402
CENG 401
Co/Prerequisites: CAAM 336 or MATH 381

For CENG 403
CENG 390, 402, and 412
Co/Prerequisites: CENG 470 and MECH 211

For CENG 404
CENG 403

For CENG 411
CENG 301 and 303

For CENG 412
CENG 411

For CENG 470
CENG 390, 402, and 412

With the written consent of the instructor, students may register for a course without completing the required prerequisite(s). Waivers, however, are not transferable.

Degree Requirements for MChE, MS, and PhD in Chemical Engineering

For general university requirements, see Graduate Degrees (pages 57–58).

MChE Program—For the MChE degree, students must complete at least 30 hours of courses beyond those counted for their undergraduate degree. At least 6 of the courses taken must be upper-level courses in chemical engineering and 1 must be an approved mathematics course. The chemical engineering courses selected should include process design (two semesters) and process control, unless courses in these subjects were taken during the student’s undergraduate studies.

MS Program—Candidates for the MS degree must:
• Complete at least 18 approved semester hours with high standing
• Submit an original research thesis
• Defend the thesis in a public oral examination

PhD Program—Candidates for the PhD degree must:
• Demonstrate competence in the areas of applied mathematics, thermodynamics, transport processes, and chemical kinetics and reactor design by passing qualifying examinations, usually during the first year of study
• Complete at least 36 approved semester hours with high standing (with department approval, the course requirements may be reduced to 24 hours for students already holding an MS degree)
• Submit a thesis that provides evidence of their ability to carry out original research in a specialized area of chemical engineering
• Defend the thesis in a public oral examination

See CENG in the Courses of Instruction section.
