

# COGNITIVE SCIENCES

---

## THE SCHOOL OF SOCIAL SCIENCES

### **DIRECTOR**

David J. Schneider

### **PROFESSORS**

John W. Clark Jr.

Steven J. Cox

James L. Dannemiller

Richard Grandy

Mark Kulstad

Randi C. Martin

James Pomerantz

Devika Subramanian

Stephen A. Tyler

Michael Watkins

James F. Young

### **PROFESSOR EMERITUS**

Sydney M. Lamb

### **ASSOCIATE PROFESSORS**

Michel Achard

Michael Byrne

Suzanne E. Kemmer

David M. Lane

Nancy Niedzielski

Tony Ro

### **ASSISTANT PROFESSORS**

Claire Bowers

Darcy Burgund

Denise Chen

Katherine Crosswhite

Robert Englebretson

### **DEGREE OFFERED: BA**

Researchers in this interdisciplinary field seek to understand such mental phenomena as perception, thought, memory, the acquisition and use of language, learning, concept formation, and consciousness. Some investigators focus on relations between brain structures and behavior, some work with computer simulation, and others work at more abstract theoretical levels.

### **DEGREE REQUIREMENTS FOR BA IN COGNITIVE SCIENCES**

For general university requirements, see Graduation Requirements (pages 14–15). Students majoring in cognitive sciences must complete 5 core courses and 7 additional courses (see below). Among the 7 additional courses, at least 3 and no more than 4 must be in a single area of concentration—linguistics, philosophy, psychology, or neuroscience.

### **INTRODUCTORY COURSES**

Because the major is interdisciplinary, no single course introduces the full range of the subject. However, students who are interested in majoring in cognitive sciences should take 1 or more of the following courses during their 1st and 2nd years: LING200, PHIL103, PSYC101, or PSYC203.

### **HONORS PROGRAM**

Students with a 3.5 GPA in cognitive sciences and 3.3 overall GPA may apply for the cognitive sciences honors program. Students in the honors program are expected to conduct an independent research project of either 1 or 2 semesters under the guidance of a member of the cognitive sciences faculty. Students who wish to enter this program should consult with prospective advisors during their junior year and submit a proposal by the end of the semester preceding the initiation of the project. Typically, this means submitting a proposal by the end of the junior year and beginning the project during the fall of the senior year. Proposal will be reviewed by both the supervisor

and the program director. Students who undertake a 2-semester project will be allowed to continue into the 2nd semester only if their advisor judges that sufficient progress has been made during the 1st semester. At the end of a project, honors students are expected to submit a final paper to both their advisor and the program director and make an oral presentation. For more details, contact the program director.

## INDEPENDENT RESEARCH

Majors may undertake supervised independent research by enrolling in CSCI390 or the honors program and may apply up to 9 credits of independent research toward the major. Students who wish to take CSCI390 must complete a CSCI390 contract and have it approved by their supervisor and the program director prior to the end of the 1st week of classes. All students taking CSCI390 also must write a substantive research paper, which is to be submitted to both their advisor and the program director at the end of the semester. (Copies of the contract form and instructions are available on the “forms” section of the cognitive sciences website.)

### Core Courses

---

The core courses are divided into 5 groups. Majors just take one course from each group.

#### **Computer Science**

*Though all of these courses may be used to satisfy the computer science core requirements, no more than 1 may be taken for credit within the major*

CAAM 210 *Introduction to Engineering Computation*

COMP 200 *Elements of Computer Science*

COMP 201 *Principles of Object-Oriented Programming*

COMP 210 *Introduction to Principles of Scientific Computation*

#### **Psychology**

PSYC 203 *Introduction to Cognitive Psychology*

#### **Linguistics**

LING 200 *Introduction to the Scientific Study of Language*

### Additional Courses

---

At least 3 and no more than 4 courses must be in 1 of the following areas of concentration: linguistics, philosophy, psychology, or neuroscience. Note: you may not use the same courses to fulfill both a core course requirement and an additional course requirement; in other words, no double counting.

#### **Cognitive Sciences**

CCSCI 390 *Supervised Research in Cognitive Science*

CSCI 481 *Honors Project*

CSCI 482 *Honors Project*

LING 306 *Language and the Mind*

LING 315 *Semantics*

#### **Philosophy**

PHIL 103 *Philosophical Aspects of Cognitive Science*

PHIL 305 *Mathematical Logic*

PHIL 312 *Philosophy of Mind*

#### **Advanced Psychology**

PSYC 308 *Memory*

PSYC 309 *Psychology of Language*

PSYC 351 *Psychology of Perception*

PSYC 360 *Thinking*

PSYC 362 *Biopsychology*

PSYC 430 *Computational Modeling of Cognitive Processes*

PSYC 432 *Brain and Behavior*

#### **Computer Science**

COMP 212 *Intermediate Programming*

COMP 440 *Artificial Intelligence*

COMP 450 *Algorithmic Robotics*

#### **Linguistics**

LING 200 *Introduction to the Scientific Study of Language*

LING 300 *Linguistic Analysis*

LING 301 *Phonetics*

LING 304 *Introduction to Syntax*

LING 306 *Language and the Mind*

LING 311 *Phonology*LING 315 *Semantics*LING 317 *Language and Computers*LING 402 *Syntax and Semantics*LING 403 *Foundations of Modern Linguistics*LING 404 *Research Methodologies and Linguistic Theories*LING 411 *Neurolinguistics*LING 412 *Language and Intelligence*LING 490 *Discourse Analysis***Neuroscience**

Many of the neuroscience courses are taught by Baylor College of Medicine faculty.
