

STATISTICS

THE GEORGE R. BROWN SCHOOL OF ENGINEERING

CHAIR

Rudy Guerra
Professors
Bryan W. Brown (*joint appointment:
Economics*)
Dennis Cox
Mahmoud El-Gamal (*joint appointment:
Economics*)
Katherine B. Ensor
Don H. Johnson (*joint appointment:
Electrical and Computer Engineering*)
Marek Kimmel
Javier Rojo
Rudy Guerra
David W. Scott
Robin Sickles (*joint appointment:
Economics*)
James R. Thompson
Edward E. Williams (*joint appointment:
Jones Graduate School of Management*)
Rick K. Wilson (*joint appointment:
Political Science*)

ASSOCIATE PROFESSORS

Steven Currall (*joint appointment:
Jones Graduate School of Management*)
David M. Lane (*joint appointment:
Psychology*)
Barbara Ostdiek (*joint appointment:
Jones Graduate School of Management*)
Rudolph H. Riedi

ADJUNCT PROFESSORS

E. Neely Atkinson
Christopher I. Amos
Donald A. Berry
Barry W. Brown
Richard Heydorn
J. Jack Lee
Peter Müller
Gary Rosner
Howard D. Thames Jr.
Stuart Zimmerman

ADJUNCT ASSOCIATE PROFESSORS

Keith A. Baggerly
Joaquin Diaz-Saiz
Kim-Anh Do
Kenneth Hess
Yu Shen
Ya-Chen Shih

ADJUNCT ASSISTANT PROFESSORS

Olga Y. Gorlova
Ilya Shmulevick

LECTURER

L. Scott Baggett

FACULTY FELLOW

Janet Siefert

DEGREES OFFERED: BA, MSTAT, MA, PHD

Course work in statistics acquaints students with the role played in the modern world by probabilistic and statistical ideas and methods. Students grow familiar with both the theory and the application of techniques in common use as they are trained in statistical research. The flexibility of the undergraduate program allows students to concentrate on theoretical or applied training, or they may link their studies in statistics to work in other related departments (see majors in economics, education, electrical and computer engineering, computational and applied mathematics, managerial studies, mathematics, political science, and psychology). Graduate study has concentrations in applied probability, bioinformatics, biomathematics, biostatistics, computational finance, data analysis, density estimation, epidemiology, image processing, model building, quality control, statistical computing, spatial processes, stochastic processes, and time series analysis. A joint MBA/master of engineering degree also is available in conjunction with the Jesse H. Jones Graduate School of Management.

DEGREE REQUIREMENTS FOR BA IN STATISTICS

For general university requirements, see Graduation Requirements (pages 14–15). Students majoring in statistics normally complete the following:

- MATH 101/102 *Single Variable Calculus I and II*
- MATH 211 *Ordinary Differential Equations and Linear Algebra*
- CAAM 210 or 211 *Introduction to Engineering Computation*
- STAT 310 *Probability and Statistics*
- STAT 410 *Introduction to Statistical Computing and Regression*
- 6 elective courses from the statistics department (or other departments with approval from their advisor) at the 300 level or higher

Mathematically oriented students should also take MATH 212 *Multivariable Calculus* and MATH 355 *Linear Algebra* (or CAAM 335 *Matrix Analysis*).

The department offers a specialization in computational finance and through the Center for Computational Finance and Economic Systems.

DEGREE REQUIREMENTS FOR MSTAT, MA, AND PHD IN STATISTICS

For general university requirements, see Graduate Degrees (pages 57–58). Admissions applications should include scores on the Graduate Record Examination (GRE) in the quantitative, verbal, and analytical tests. Financial support is available for well-qualified doctoral students. Course work for all degree programs should be at the 400 level or above, although 2 approved 300-level courses may be accepted.

Master's Programs—Candidates for the nonthesis MStat degree must complete 30 semester hours of approved course work. Candidates for the MA degree in statistics must complete 30 semester hours of approved course work as well as 1 of the following: (1) complete an original thesis and defend it in a public oral examination; or (2) perform satisfactorily on the 2nd-year PhD comprehensive examinations.

PhD Program—Candidates for the PhD degree in statistics must complete at least 90 semester hours of approved course work beyond the bachelor's degree and a minimum of 60 hours beyond a master's degree, perform satisfactorily on preliminary and qualifying examinations, and complete an original thesis with a public oral defense.

See STAT in the Courses of Instruction section.
