

# CHEMISTRY

## THE WIESS SCHOOL OF NATURAL SCIENCES

### CHAIR

Seiichi P. T. Matsuda

### PROFESSORS

Andrew R. Barron

W. Edward Billups

Philip R. Brooks

Vicki L. Colvin

Paul S. Engel

Naomi Halas

John S. Hutchinson

James L. Kinsey

Ronald J. Parry

Gustavo E. Scuseria

James M. Tour

R. Bruce Weisman

Kenton H. Whitmire

Lon J. Wilson

Boris I. Yakobson

### PROFESSORS EMERITI

Robert F. Curl, Jr.

Graham Glass

Norman Hackerman

Edward S. Lewis

### ASSOCIATE PROFESSORS

Cecilia Clementi

Anatoly Kolomeisky

Andreas Lüttge

Matteo Pasquali

E. Pernilla L. Wittung-Stafshede

Michael S. Wong

### ASSISTANT PROFESSORS

Zachary Ball

Michael Diehl

Jason H. Hafner

Jeffrey D. Hartgerink

Stephan Link

Eugene Zubarev

### ADJUNCT PROFESSORS

Marco Ciufolini

Tohru Fukuyama

Scott Gilbertson

Peter Harland

Dieter Heymann

Michael Metzker

M. Robert Willcott

### LECTURERS

Lawrence B. Alemany

Mary E. R. McHale

### INSTRUCTOR

Margaret H. Hennessy

### DISTINGUISHED FACULTY FELLOW

Robert H. Hauge

Bruce R. Johnson

### FACULTY FELLOWS

Valery Khabashesku

Kristen Kulinowski

## DEGREES OFFERED: BA, BS, MA, PHD

The undergraduate BS degree program is designed as a rigorous program for preparing students for advanced work in chemistry or a related discipline. The BA degree program is designed with a broader and more flexible program that can more easily be coupled with other majors or professional career paths. Both degree programs offer students a solid background in the fundamental principles of chemistry, the properties and reactions of chemical compounds and their uses.

Graduate studies emphasize individual research together with a fundamental understanding of chemistry beyond the students' specific interests. Faculty research interests include the synthesis and biosynthesis of organic natural products; supramolecular chemistry, molecular recognition, and biological catalysis; bioinorganic and organometallic chemistry; main group element and transition metal chemistry; the chemistry of the main group elements; the design of nanophase solids; molecular photochemistry and photophysics; infrared kinetic spectroscopy, laser, and NMR spectroscopy; studies of electron transfer in crossed beams; theoretical and computational chemistry; and the study of fullerene molecules, carbon nanotubes, and their derivatives; polymer synthesis

and characterization; molecular electronics; and molecular machines.

## DEGREE REQUIREMENTS FOR BA IN CHEMISTRY

For general university requirements, see Graduation Requirements (pages 14–15). Students choosing to receive a BA in chemistry must have a total of at least 120 semester hours at graduation, including the following courses required of all majors.

### Core Courses Required of All Chemistry Majors

---

#### **Chemistry**

CHEM 121/122 *General Chemistry* with laboratory or CHEM 151/152 *Honors Chemistry* with laboratory

CHEM 211/212 *Organic Chemistry* or CHEM 251/252 *Honors Organic Chemistry*

CHEM 311/312 *Physical Chemistry*

CHEM 351 *Introductory Module in Experimental Chemistry I*

CHEM 352 *Introductory Module in Experimental Chemistry II*

CHEM 353 *Introductory Module in Analytical Methods*

CHEM 360 *Inorganic Chemistry*

#### **Mathematics\***

MATH 101/102 *Single Variable Calculus I and II*

MATH 211 *Ordinary Differential Equations and Linear Algebra*

MATH 212 *Multivariable Calculus*

(MATH 221/222 *Honors Calculus III and IV* may substitute for MATH 211/212)

#### **Physics**

PHYS 101 or 111 *Mechanics*

PHYS 102 or 112 *Electricity and Magnetism*

#### **Other**

One course from the following: NSCI 230, CAAM 210, CAAM 335, CAAM 336, CAAM 353, CHBE 305, or approved equivalent.

\* The Department of Mathematics may, after consultation with a student concerning his/her previous math preparation, recommend that a student be placed into a higher level math course than for which the student has official credit. The Department of Chemistry will accept this waiver of the math classes upon a written confirmation of the waiver from the Department of Mathematics and upon the student's successful completion of the higher level math course.

#### **Additional Lecture Courses**

**At least 1 course from the following:**

CHEM 401 *Advanced Organic Chemistry*

CHEM 430 *Quantum Chemistry*

CHEM 495 *Transition Metal Chemistry*

#### **Additional Laboratory Courses**

**At least 4 advanced laboratory module credit hours from the following list:**

CHEM 372 *Advanced Module in Synthesis and Characterization of Fullerene Compounds*

CHEM 373 *Advanced Module in Chemistry and Properties of Fullerene Compounds*

CHEM 374 *Advanced Module in*

*Synthetic Chemistry*

CHEM 375 *Advanced Module*

*in Nanochemistry*

CHEM 378 *Advanced Module in Plant Natural Products Biochemistry*

CHEM 381 *Advanced Module in Experimental Physical Chemistry*

CHEM 382 *Advanced Module in Kinetic Physical Chemistry*

CHEM 384 *Advanced Module in Instrumental Analysis*

CHEM 395 *Advanced Module in Green Chemistry*

CHEM 399 *Advanced Module: Experimental Design*

CHEM 435 *Methods of Computational Quantum Chemistry*

(CHEM 215 may substitute for one Advanced Laboratory Module)

Other advanced laboratory courses from chemically related disciplines (biochemistry, materials science, environmental engineering, etc.) may be substituted for these advanced modules, with approval of the committee. Students interested in applying for health professions programs are advised to take CHEM 215 (consult with the health professions advisor). Three hours of CHEM 491 (taken for 1 entire semester) may be substituted for 1 advanced laboratory module if no other CHEM 491 credit is taken in the same semester.

Students in the chemistry BA major must satisfy the university distribution requirements and complete no fewer than 65 semester hours in addition to the departmental requirements for the chemistry major, giving a minimum total of 120 hours for graduation.

## DEGREE REQUIREMENTS FOR BS IN CHEMISTRY

In addition to the core courses required of all chemistry majors, the BS degree requires the following course and laboratory work:

- 1 additional course from the **Additional Lecture Courses** list
- At least 3 semester hours in undergraduate research (CHEM 491) in a single semester. With departmental approval, students may satisfy this requirement with HONS 470/471, which requires participation in CHEM 491 meetings. Students also may satisfy 3 of the 6 required hours in upper-level courses with additional research.
- 6 hours credit in upper-level courses (300 level or higher) in chemistry, mathematics, computational and applied mathematics, physics, biochemistry, or other subjects with advisor approval.

PHYS 201 *Waves and Optics* and PHYS 202 *Modern Physics* are recommended but not required.

Students in the chemistry BS major must satisfy the distribution requirements (see pages 15–16) and complete no fewer than 60 semester hours in addition to the departmental requirements for the chemistry major, giving a minimum total of 127 hours for graduation.

**American Chemical Society Certification**—The Rice Department of Chemistry is on the approved list of the Committee on Professional Training of the American Chemical Society and so can certify that graduates have met the appropriate standards. The BA degree is not certifiable. For certification, students must complete:

- All degree requirements for the BS degree listed above
- CHEM 495 *Transition Metal Chemistry* as one of the additional lecture courses
- A department-approved course in biochemistry
- 9 hours total in upper-level courses from chemistry, physics, mathematics, computational and applied mathematics, biochemistry, or other courses in science or engineering with the approval of the department. The required course in biochemistry listed above counts toward this total.

A foreign language, preferably German, is recommended.

**Chemical Physics Major**—The chemical physics major leading to a BS degree is offered in conjunction with the Department of Physics and Astronomy. Students take upper-level courses in both chemistry and physics, focusing on the applications of physics to chemical systems. Students majoring in chemical physics must complete the following courses:

**Core Courses Required of All Chemical Physics Majors****Chemistry**CHEM 121/122 *General Chemistry with**Laboratory* or CHEM 151/152 *Honors**Chemistry with Laboratory*CHEM 211 *Organic Chemistry* or CHEM 251*Honors Organic Chemistry*CHEM 311/312 *Physical Chemistry***Physics**PHYS 101 or 111 *Mechanics*PHYS 102 or 112 *Electricity and Magnetism*PHYS 201 *Waves and Optics*PHYS 202 *Modern Physics*PHYS 231 *Elementary Physics Lab II*PHYS 301 *Intermediate Mechanics*PHYS 302 *Intermediate Electrodynamics***Mathematics**MATH 101/102 *Single Variable Calculus I and II*MATH 211 *Ordinary Differential Equations and Linear Algebra*MATH 212 *Multivariable Calculus* (MATH 221/222 *Honors Calculus* III and IV may substitute for MATH 211/212)**Additional Courses**

1 course from CHEM 212 or CHEM 360

2 courses from PHYS 311, PHYS 312, CHEM 430, or CHEM 415

6 hours from CHEM 215, CHEM 351, CHEM 352, CHEM 372–395, CHEM 435, PHYS 331, or PHYS 332. Up to 2 hours of independent research (CHEM 491 or PHYS 491/492 may be counted toward this requirement.)

6 credit hours from NSCI 230, CAAM 210, or mathematics or computational and applied mathematics at the 300 level or above

**ADMISSION REQUIREMENTS FOR ACCELERATED BS/PHD PROGRAM IN CHEMISTRY**

The high level of training provided in the Rice BS program enables certain specially qualified undergraduates to enter an accelerated program that allows them to complete a PhD degree in significantly less time after receiving their BS degree.

Students wishing to be considered for the accelerated BS/PhD program should contact the chemistry department graduate admissions committee.

**DEGREE REQUIREMENTS FOR MA AND PHD IN CHEMISTRY**

For general university requirements, see Graduate Degrees (pages 57–58). Students who have completed course work equivalent to that required for a BA or BS in chemistry may apply for admission to the PhD program. For more information, see Admission to Graduate Study (pages 56–57).

**MA Program**—Students are NOT normally admitted to study for an MA degree. However, this degree is sometimes awarded to students who do not wish to complete the entire PhD program. Candidates for the MA degree must:

- Complete 6 one-semester courses
- Produce a thesis that presents the results of a program of research approved by the department
- Pass a final thesis defense

Students who are admitted to PhD candidacy may apply for an automatic master's degree.

**REQUIREMENTS FOR THE PHD IN CHEMISTRY AT RICE UNIVERSITY**

The PhD in Chemistry is awarded for original research in chemistry. Candidates receive a PhD after successfully completing at least 90 semester hours of advanced study in chemistry and related fields, culminating in a thesis that

describes an original and significant investigation in chemistry. The thesis must be satisfactorily defended in a public oral examination. The student must pass the thesis defense before the end of the 16th semester of residency.

## RESEARCH

During the 1st semester of residence students will select a research advisor from among the members of the faculty; the department chair must approve this choice. In some cases, students may choose research advisors outside of the department; however, such arrangements must be approved by the chemistry faculty. The research advisor will guide the student in the choice of an appropriate research topic and in the detailed training required to complete that project. Students must enroll in CHEM 800 (Graduate Research) and must participate in 1 of the graduate seminar classes offered by the department (currently CHEM 600) each semester that the student is in residence.

## COURSE WORK

The student must complete 6 3-semester-hour graduate-level lecture courses at Rice University. In order to satisfy this requirement, each of these courses must satisfy the following criteria:

- They must be approved by the department's graduate advising committee.
- If a chemistry course, it must be at the 400 level or higher. Certain 300-level courses in other departments may be acceptable with prior approval by the department's graduate advising committee. Courses must be in technical subjects in science or engineering. Courses in teaching, presentation, or management will not be counted toward the 6-class requirement.
- Each course must be passed with a grade of B- or higher. It is possible to repeat or replace a course, upon approval of the department's graduate advising committee. A maximum of 2 courses can be repeated/replaced.

Students transferring from other graduate institutions or students with a master's degree can apply to have a maximum of 2 courses waived. A course waiver request must be accompanied by proof that a course pertinent to the student's field of research has been successfully completed at a different institution. Waiver requests must be submitted for approval to the department's graduate advising committee.

## TEACHING

Each student is required to participate in teaching for up to 4 semesters. Actual assignments are determined by departmental needs.

## QUALIFYING EXAMINATION

To advance to candidacy, the student must pass a candidacy examination. The exam has written and oral components, and the expectations for these are available in the department office. The examination committee will be composed of 3 faculty members, excluding the research advisor. The written document must be submitted to the committee at least one week before the date of the oral examination. The examination (including any follow-up work deemed necessary by the committee) must be passed by the last day of class at the end of the student's fourth semester in residency.

### **ADVANCEMENT TO CANDIDACY FOR THE PHD**

The course and examination requirements listed above must be completed within 2 years of admittance to the graduate program. After completing these requirements, a student must petition to be advanced to candidacy for the PhD degree. Upon advancement to candidacy, a student chooses a thesis committee of at least 3 faculty members with the guidance and approval of the research advisor and department chair. The thesis committee must include one faculty member holding his/her primary appointment outside of the chemistry department.

### **SATISFACTORY PERFORMANCE**

In order to remain in good standing, a student must receive grades above B- in CHEM 800, CHEM 700, and the various seminar courses. A student must maintain a GPA of 3.00 (B) or higher in all lecture courses. Failure to maintain satisfactory progress in research and/or grades will result in probation and possible dismissal.

Students are expected to perform satisfactorily in research as judged by their research director and thesis committee. Students also may be requested to fulfill certain service functions for the department. The student must be enrolled full time in a research group each semester that the student is in residence (except the first semester).

The student, advisor, or committee may request a meeting between student and committee at any time to evaluate progress or to determine a course of action. The thesis committee will assess the progress being made in research and may invite the student to present a discussion of his or her work. If progress is unsatisfactory, the committee may recommend a semester of probation, which could result in dismissal from the program if progress remains unsatisfactory in the subsequent semester.

### **APPEAL**

Students may petition the Chemistry Department Graduate Advising Committee for variances on these academic regulations.

**See CHEM in the Courses of Instruction section.**
