Earth Science

The Wiess School of Natural Sciences

Chair
Alan Levander

Professors
John B. Anderson
Gerald R. Dickens
André W. Droxler
Richard G. Gordon
Adrian Lenardic
Andreas Luttge
Julia Morgan
Dale S. Sawyer
Colin Zelt

Associate Professors
Cin-Ty Lee
Fenglin Niu

Assistant Professors
Rajdeep Dasgupta
Brandon Dugan
Helge Gonnemann
Caroline Masiello

Adjunct Professors
Vitor Abreu
K. K. Bissada
Stephen H. Danbom
Jeffrey J. Dravis
Paul M. Harris
N. Ross Hill
Thomas A. Jones
Stephen J. Mackwell
W. C. Rusty Riese
Juan Antonio Simo
Fred M. Weaver

Adjunct Associate Professors
Patrick J. McGovern
David L. Olgaard

Adjunct Assistant Professors
Cornelius Fischer
Stephanie S. Shipp
Julia S. Wellner

Earth Science Research Scientists
Rolf Arvidson
Glen Snyder

Wiess Visiting Scholars
Francis Albarède
Janne Blichert-Toft

Visiting Research Scientists
Tibisay Perez
Maik Pertermann

Earth Science Lecturers
Vitor Abreu
Stephen H. Danbom
W. C. Rusty Riese

Earth Science Postdoctoral Research Associates
Aimin Cao
Justin Filiberto
Thomas Fournier
Tobias Hoeink
Veronique Le Roux
Peter Luffi
Everett Salas
Bing Shen
Davin Wallace

Earth Science Joint Appointment (with Chemistry)
Andreas Luttge

Earth Science Joint Appointment (with Computational and Applied Mathematics)
William W. Symes

ESCI Degrees Offered: BA, BS, MS, PhD

All undergraduate majors in earth science take a four-course core sequence, typically in the sophomore and junior years, on earth processes, materials, observations, and history. Majors also take a course in geological field techniques and introductory courses in mathematics, chemistry, and in many cases, physics and biology.

The selection of upper-division courses and additional science courses depends on which major, BA or BS, and, for the BS major, which of five tracks are chosen by the student: geology, geochemistry, geophysics, environmental earth science, or a track designed by the student subject to the approval of the department undergraduate advisor. The program of study typically includes experience with analytical equipment, computer systems, and fieldwork.
The BS in earth science degree should be chosen by students planning a career or further study in earth science or a related field. The BA in earth science degree has fewer requirements and might be a good choice for students planning a career or further study to which earth science is incidental.

**Degree Requirements for BS in Earth Science**

For general university requirements, see Graduation Requirements (Undergraduate Students section, pages 2–5).

BS majors also must complete the “Additional Requirements” for one track (described below).

**The following courses are required for all tracks:**

- MATH 101/102 *Single Variable Calculus I and II*
- CHEM 121/122 or 151/152 *General Chemistry I and II with lab*
- PHYS 101/102 or 111/112 *Introductory Physics I and II with lab*

**Additional Requirements for the Geology Track**

**The following courses are required:**

- MATH 211 *Ordinary Differential Equations and Linear Algebra*
- ESCI 390 *Geology Field Camp*
- ESCI 442 *Exploration Geophysics I*

**Choose one of the following courses:**

- COMP 110 *Computation in Natural Science*
- CAAM 210 *Introduction to Engineering Computation*
- COMP 210 *Principles of Computing and Programming*

**Choose one of the following courses:**

- ESCI 412 *Advanced Petrology*
- ESCI 430 *Principles of Trace-Element and Isotope Geochemistry*

**Additional Requirements for the Geochemistry Track**

**The following courses are required:**

- BIOS 201 *Introductory Biology I*
- ESCI 390 *Geology Field Camp* or
- ESCI 391 *Earth Science Field Experience*

**Choose nine hours from the following:**

- ESCI 340 *Global Biogeochemical Cycles*
- ESCI 412 *Advanced Petrology*
- ESCI 421 *Paleoceanography*
- ESCI 425 *Organic Geochemistry*
- ESCI 458 *Thermodynamics/Kinetics for Geoscientists*
- ESCI 203 *Biogeochemistry*

**Choose eight hours from the following:**

All upper division ESCI courses
- CEVE 401 *Introduction to Environmental Chemistry*
- CEVE 403 *Principles of Environmental Engineering*
- CEVE 434 *Chemical Transport and Fate in the Environment*
- CEVE 532 *Physical-Chemical Processes in Environmental Engineering*
- CEVE 534 *Transport Phenomena and Environmental Modeling*
### Additional Requirements for the Geophysics Track

**The following courses are required:**
- MATH 211 *Ordinary Differential Equations and Linear Algebra*
- MATH 212 *Multivariable Calculus*
- PHYS 201 *Waves and Optics*
- PHYS 231 *Elementary Physics Lab II*
- ESCI 390 *Geology Field Camp or Earth Science Field Experience*

**Choose one of the following courses:**
- COMP 110 *Computation in Natural Science*
- CAAM 210 *Introduction to Engineering Computation*
- COMP 210 *Principles of Computing and Programming*

**Choose six hours from the following:**
- ESCI 418 *Quantitative Hydrogeology*
- ESCI 440 *Geophysical Data Analysis: Digital Signal Processing*
- ESCI 441 *Geophysical Data Analysis: Inverse Theory*
- ESCI 442 *Exploration Geophysics I*
- ESCI 444 *Exploration Geophysics II*
- ESCI 450 *Remote Sensing*
- ESCI 454 *Geographic Information Science*
- ESCI 461 *Seismology I*
- ESCI 462 *Tectonophysics*
- ESCI 464 *Global Tectonics*
- ESCI 532 *Advanced Global Tectonics*
- ESCI 542 *Seismology II*

**Choose six hours from the immediately preceding or following lists:**
- Any three- or four-hour course in ESCI with a number between 411 and 475, except for research and special studies
- Any 300- or 400-level MATH, CAAM, or PHYS class
- CHEM 311 *Physical Chemistry*

### Additional Requirements for the Environmental Earth Science Track

**The following courses are required:**
- MATH 211 *Ordinary Differential Equations and Linear Algebra*
- BIOS 202 *Introductory Biology I*

**Choose one of the following courses:**
- COMP 110 *Computation Science and Engineering*
- CAAM 210 *Introduction to Engineering Computation*
- COMP 210 *Introduction to Principles of Scientific Computing*

**Choose 11 hours from the following, including at least two courses in ESCI:**
- ESCI 340 *Global Biogeochemical Cycles*
- ESCI 441 *Geophysical Data Analysis: Inverse Theory*
- ESCI 442 *Exploration Geophysics I*
- ESCI 444 *Exploration Geophysics II*
- ESCI 450 *Remote Sensing*
- ESCI 454 *Geographic Information Science*
- ESCI 464 *Global Tectonics*
- ESCI 532 *Advanced Global Tectonics*
- ESCI 542 *Seismology II*
- CHEM 311 *Physical Chemistry*
The following courses are required:

- MATH 101/102 Single Variable Calculus I and II
- CHEM 121/122 or 151/152 General Chemistry I and II with lab
- ESCI 321 Earth System Evolution and Cycles
- ESCI 322 Earth Chemistry and Materials
- ESCI 323 Earth Structure and Deformation with lab
- ESCI 324 Earth’s Interior
- ESCI 394 Geophysical and Geophysical Techniques

Choose six hours from the following:

- BIOL 201/202 Introductory Biology I and II
- BIOL 211, 213 Biology Lab Modules

Choose six hours in science and engineering (including ESCI) courses at the 200 level or above approved by the department undergraduate advisor.

Choose nine hours from the following:

- BIOS 201 Introductory Biology I
- COMP 110 Computation in Natural Science
- CAAM 210 Introduction to Engineering Computation
- COMP 210 Principles of Computing and Programming
- CHEM 311/312 Physical Chemistry I and II
- MATH 211 Ordinary Differential Equations and Linear Algebra

Choose 12 hours of additional courses numbered 300 or higher targeting a coherent theme from an approved list of 300- or higher-level courses, from inside or outside the department. Interested students are expected to submit a statement of rationale by the beginning of their third year.

Choose 12 hours of additional courses numbered 300 or higher targeting a coherent theme selected with approval of the department undergraduate advisor.

Degree Requirements for BA in Earth Science

For general university requirements, see Graduation Requirements (Undergraduate Students section, pages 2–5).

The following courses are required:

- MATH 101/102 Single Variable Calculus I and II
- CHEM 121/122 or 151/152 General Chemistry I and II with lab
- ESCI 321 Earth System Evolution and Cycles
- ESCI 322 Earth Chemistry and Materials
- ESCI 323 Earth Structure and Deformation with lab
- ESCI 324 Earth’s Interior
- ESCI 394 Geophysical and Geophysical Techniques

Choose six hours from the following:

- BIOL 201/202 Introductory Biology I and II
- BIOL 211, 213 Biology Lab Modules

Choose four upper division ESCI courses, approved by the department undergraduate advisor.

Choose six hours in science and engineering (including ESCI) courses at the 200 level or above approved by the department undergraduate advisor.
Undergraduate Independent Research

The department encourages, but does not require, earth science undergraduate majors to pursue independent supervised research in ESCI 481 Research in Earth Science. See also Honors Programs (Undergraduate Students section, pages 15).

Degree Requirements for MS and PhD in Earth Science

All incoming students should have a strong background in physics, chemistry, and mathematics and should have, or should acquire, a broad grounding in fundamental earth science. The department encourages applications from well-qualified students with degrees in the other sciences, mathematics, or engineering. For general university requirements, see Graduate Degrees (Graduate Student section, pages 3–4). The requirements for the MS and PhD in earth science are similar, but the PhD demands a significantly higher level of knowledge, research skills, and scholarly independence. Most students need at least two years beyond the bachelor's degree to complete the MS or four to complete the PhD.

Candidates determine, with their major professor and thesis committee, a course of study following the Guidelines for Advanced Degrees in the Department of Earth Science distributed to all incoming students. For both degrees, candidates must:

- Complete 20 semester hours of course work at the 400 level and above (or other approved courses), not including research hours
- Pass a written preliminary exam
- Maintain a grade point average of 3.00 (B) or better
- Prepare a written thesis comprised of peer-reviewed publication(s) that represent an original contribution to science
- Defend the research and conclusions of the thesis in an oral examination

Students with a bachelor's degree and department approval may work directly toward the PhD, in which case the course of study is equivalent to that required for both degrees; performance on the examinations and the thesis, however, should be at the level required for the PhD. Because the graduate programs require full-time study and close interaction with faculty and fellow students, the department discourages students from holding full (or nearly full) time jobs outside the university. Outside employment must be approved by the chair.

See ESCI in the Courses of Instruction section.
