

CHEMICAL AND BIOMOLECULAR ENGINEERING

THE GEORGE R. BROWN SCHOOL OF ENGINEERING

CHAIR

Kyriacos Zygorakis

PROFESSORS

Walter G. Chapman

Vicki Colvin

George J. Hirasaki

Antonios G. Mikos

Clarence A. Miller

Matteo Pasquali

Marc A. Robert

Ka-Yiu San

Jennifer L. West

PROFESSOR IN THE

PRACTICE

Kenneth R. Cox

PROFESSOR EMERITI

William W. Akers

Constantine Armeniades

Sam H. Davis

Derek C. Dyson

Jesse David Hellums

Joe W. Hightower

Riki Kobayashi

ASSOCIATE PROFESSORS

Cecilia Clementi

Anatoly B. Kolomeisky

Michael S. Wong

ASSISTANT PROFESSORS

Sibani Lisa Biswal

Ramon Gonzalez

Deepak Nagrath

Laura Segatori

Rafael Verduzco

ADJUNCT PROFESSORS

Marek Behr

Jefferson Creek

Richard B. Strait

ADJUNCT ASSOCIATE PROFESSORS

Ananth Annapragada

Thomas W. Badgwell

Waylon V. House

ADJUNCT ASSISTANT PROFESSORS

David A. Hokanson

Andreas N. Matzakos

DEGREES OFFERED: BA, BSChE, MChE, MS, PHD

This major gives undergraduates a sound scientific and technical grounding for further development in a variety of professional environments. Courses in mathematics, chemistry, physics, and computational engineering provide the background for the chemical engineering core, which introduces students to chemical process fundamentals, fluid mechanics, heat and mass transfer, thermodynamics, kinetics, reactor design, process control, product and process design. Course electives may be used to create a focus area in one of the following four disciplines: biotechnology/bioengineering, environmental engineering, materials science/engineering, and computational engineering. Upon completing either the flexible BA requirements or the more scientific and professional BSChE requirements, students may apply for a fifth year of study leading to the nonthesis Master of Chemical Engineering (MChE) degree. A joint MBA/MChE degree also is available in conjunction with the Jesse H. Jones Graduate School of Management.

Students admitted for graduate studies leading to the MS or PhD degrees must complete a rigorous program combining advanced course work and original research that must be formalized in an approved thesis. Graduate research is possible in a number of areas, including catalysis and nanotechnology, thermodynamics and phase equilibria, interfacial phenomena, colloids, microemulsions, rheology and fluid mechanics, biosystems engineering, biocatalysis and metabolic engineering, cell population heterogeneity and biological pattern formation, cellular and tissue engineering, energy and sustainability, gas hydrates, enhanced oil recovery, reservoir characterization, and pollution control.

DEGREE REQUIREMENTS FOR BS IN CHEMICAL ENGINEERING

For general university requirements, see Graduation Requirements (Undergraduate Students section, pages 2–5). The BS degree is accredited by the Accreditation Board for Engineering and Technology (ABET). Through careful selection of other engineering and science courses, a student can develop a focus (or concentration) area in any of the following four engineering disciplines: biotechnology/bioengineering, environmental engineering, materials science/engineering, and computational engineering. These elective programs can be completed within the framework of a BS in chemical engineering. Students majoring in chemical engineering must complete 96–100 hours in the courses specified below for a minimum of 132 hours at graduation.

The undergraduate curriculum is designed so that outstanding students interested in careers in research and teaching may enter graduate school after earning either bachelor's degree.

ENGINEERING BREADTH AND FOCUS AREA OPTIONS

To complete their technical education, Rice students seeking a BS degree in chemical engineering take course electives in at least two other engineering disciplines to satisfy a “breadth” requirement.

Alternatively, students can use their electives to create a focus (or concentration) area in one of the following four disciplines:

- biotechnology/bioengineering
- computational engineering
- environmental engineering
- materials science/engineering

Consult our department web page for a detailed list of courses that can be used to satisfy the engineering breadth or focus area requirements.

DEGREE REQUIREMENTS FOR BSCHE IN CHEMICAL ENGINEERING***Chemistry***

CHEM 121/122 *General Chemistry with Laboratory*

CHEM 211 *Organic Chemistry*

CHEM 217 or 215 *Organic Chemistry Lab*

CHEM 311/312 *Physical Chemistry*

Any 2 of CHEM 212, CHEM 310, CHEM 330, or CHEM 360

Chemical and Biomolecular Engineering

CHBE 301 *Chemical Engineering Fundamentals*

CHBE 303 *Computer Programming in Chemical Engineering*

CHBE 305 *Computational Methods for Chemical Engineers*

CHBE 310 *Introduction to Biomolecular Engineering*

CHBE 343 *Chemical Engineering Lab I*

CHBE 390 *Kinetics and Reactor Design*

CHBE 401/402 *Transport Phenomena I and II*

CHBE 403 *Design Fundamentals*

CHBE 404 *Product and Process Design*

CHBE 411/412 *Thermodynamics I and II*

CHBE 443 *Chemical Engineering Lab II*

CHBE 470 *Process Dynamics and Control*

Mathematics

MATH1 101/102 *Single Variable Calculus I and II*

MATH 211 *Ordinary Differential Equations and Linear Algebra*

MATH 212 *Multivariable Calculus or equivalent honors courses*

CAAM 336 *Differential Equations in Science and Engineering or*

MATH 381 *Introduction to Partial Differential Equations*

Physics

PHYS 101 or 111 *Mechanics*

PHYS 102 or 112 *Electricity and Magnetism*

Mechanical Engineering

MECH 211 *Engineering Mechanics*

Students pursuing the BA degree in chemical engineering must meet all of the requirements for the BSChE degree with the following exceptions: CHBE 404, CHBE 443, CHBE 470, and MECH 211 are not required. Also, they do not have to satisfy the requirements for either the engineering breadth or the focus area. Free electives may be substituted for these requirements to reach at least 132 semester hours for graduation.

Prerequisites for Chemical Engineering Courses—Before undergraduates may register for courses in chemical engineering at the 300-level and above, they must satisfy the following prerequisites.

For CHBE 301

MATH 101/102

CHEM 121/122

Corequisite: CHBE 303

For CHBE 303

Corequisite: CHBE 301

For CHBE 305

CHBE 301 and 303

For CHBE 310

CHBE 301, 390, and 411

For CHBE 343

CHBE 390, 401, and 412

For CHBE 390

CHBE 301 and 303

MATH 211/212

Co/prerequisite: CHBE 305

For CHBE 401

CHBE 411

MATH 211/212

PHYS 101/102

Co/Prerequisite: CHBE 305

For CHBE 402

CHBE 401

Co/Prerequisites: CAAM 336 or MATH 381

For CHBE 403

CHBE 390, 402, and 412

Co/Prerequisites: CHBE 470

For CHBE 404

CHBE 403

For CHBE 411

CHBE 301 and 303

For CHBE 412

CHBE 411

For CHBE 443

CHBE 343

For CHBE 470

CHBE 390, 402, and 412

DEGREE REQUIREMENTS FOR MChE, MS, AND PHD IN CHEMICAL ENGINEERING

For general university requirements, see Graduate Degrees (Graduate Students section, pages 3–4).

MChE Program—For the MChE degree, students must complete at least 30 hours of courses beyond those counted for their undergraduate degree. At least six of the courses taken must be upper-level courses in chemical engineering and one must be an approved mathematics course. The chemical engineering courses selected should include process design (two semesters) and process control, unless courses in these subjects were taken during the student's undergraduate studies.

MS Program—Candidates for the MS degree must:

- Complete at least 18 approved semester hours with high standing
- Submit an original research thesis
- Defend the thesis in a public oral examination

PhD Program—Candidates for the PhD degree must:

- Satisfactorily complete 36 semester hours of advanced course work, including both general and specialized topics (students who already have an MS degree in chemical engineering can request departmental approval for a reduction in the number of required courses)

4 DEPARTMENTS / Chemical and Biomolecular Engineering

- Pass qualifying examinations demonstrating a general understanding of reaction engineering, thermodynamics, transport phenomena, and applied mathematics
- Prepare and present a thesis proposal
- Complete a publishable thesis representing research that is an original and significant contribution to the field of chemical and biomolecular engineering
- Pass a public oral examination in defense of the thesis
- Fullfill a residency requirement
- Complete a teaching assignment

See CHBE in the Courses of Instruction section.
