

THE JAMES A. BAKER III INSTITUTE FOR PUBLIC POLICY  
RICE UNIVERSITY

The mission of the Baker Institute is to help bridge the gap between the theory and practice of public policy by drawing together experts from academia, government, media, business and nongovernmental organizations. By involving policymakers and scholars, as well as students (tomorrow's policymakers and scholars), the institute seeks to improve the debate on selected public policy issues and to make a difference in the formulation, implementation, and evaluation of public policy, both domestic and international. The Baker Institute is an integral part of Rice University, one of the nation's most distinguished institutions of higher education. The efforts of Baker Institute fellows and affiliated Rice faculty focus on several ongoing research projects, details of which can be found on the institute's Web site, <http://bakerinstitute.org>.

THE BAKER INSTITUTE ENERGY FORUM

Located in Houston, Texas, the energy capital of the world, the Baker Institute has created a multifaceted program designed to promote original, forward-looking discussion and research on the energy-related challenges facing our society in the 21st century. The mission of the Energy Forum is to shed light on important trends – both regional and global – that shape the nature of global energy markets and influence the quantity and security of vital supplies needed to fuel world economic growth and prosperity. Our choice of the word “forum” is deliberate. It reflects our goal to serve as a focal point for the exchange of ideas on how to improve understanding of the complex political, cultural, religious, economic and social forces that influence open access to energy resources and their equitable distribution.

THE UNITED STATES ASSOCIATION FOR ENERGY ECONOMICS

The United States Association for Energy Economics (USAEE) is a nonprofit organization of business, government, academic and other professionals that advances the understanding and application of economics across all facets of energy development and use, including theory, business, public policy and environmental considerations. To this end, the USAEE provides a forum for the exchange of ideas, advancements and professional experiences, promotes the development and education of energy professionals, and fosters an improved understanding of energy economics and energy-related issues by all interested parties.

THE BP STATISTICAL REVIEW  
OF WORLD ENERGY

JUNE 24, 2008

BAKER HALL

THE BAKER INSTITUTE ENERGY FORUM  
JAMES A. BAKER III INSTITUTE FOR PUBLIC POLICY  
RICE UNIVERSITY

AND

THE UNITED STATES ASSOCIATION FOR ENERGY ECONOMICS

For 57 years, the BP Statistical Review of World Energy has provided high-quality, objective and globally consistent data on world energy markets. The Review is one of the most widely respected and authoritative publications in the field of energy economics and is used for reference by the media, academia, world governments and energy companies. A new edition is published every June.

**Mark Finley** is the general manager of global energy markets for BP America in Washington, D.C. He is responsible for BP's coverage of global energy markets as well as the annual BP Statistical Review of World Energy. He previously served as a senior member of BP's economics team in London and Washington, D.C. Finley has more than 20 years of private and public sector experience as an energy economist. He is a Phi Beta Kappa graduate of the University of Michigan (economics), and he holds graduate degrees from Northwestern University (economics) and The George Washington University (finance).
